The FSI project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No 727145.

Russia accounts for less than 1 per cent of the global market for offshore financial services, making it a small player compared with other secrecy jurisdictions.

The ranking is based on a combination of its secrecy score and scale weighting (click here to see our full methodology).

The secrecy score of 64 per cent has been computed as the average score of 20 Key Financial Secrecy Indicators (KFSI), listed on the right. Each KFSI is explained in more detail by clicking on the KFSI on the right.

A grey tick indicates full compliance with the relevant indicator, meaning least secrecy; red indicates non-compliance (most secrecy); colours in between partial compliance.

This paper draws on data sources including regulatory reports, legislation, regulation and news available as of 30.09.2017.

Full data on Russia is available here: http://www.financialsecrecyindex.com/database.
